3. Configuration de l'appareil

- a. Dans le menu de l'appareil, cliquer sur l'onglet **Settings**. Renseigner dans le champ **User** l'adresse mail de l'utilisateur du téléphone et dans le champ **Location** « France ». Cliquer sur **Save**

The screenshot shows the Miradore web interface. On the left is a navigation menu with sections: Dashboard, Reports, Map, Enrollment, Management, and Company. The 'Management' section is expanded, showing 'Devices' as the selected item. The main content area displays the configuration for a 'Xiaomi Redmi 9C NFC' device. A modal window titled 'Settings' is open, showing fields for 'User' (set to 'leila'), 'Organization' (empty), and 'Location' (set to 'France'). The 'Save' button at the bottom of the modal is highlighted with a green box.

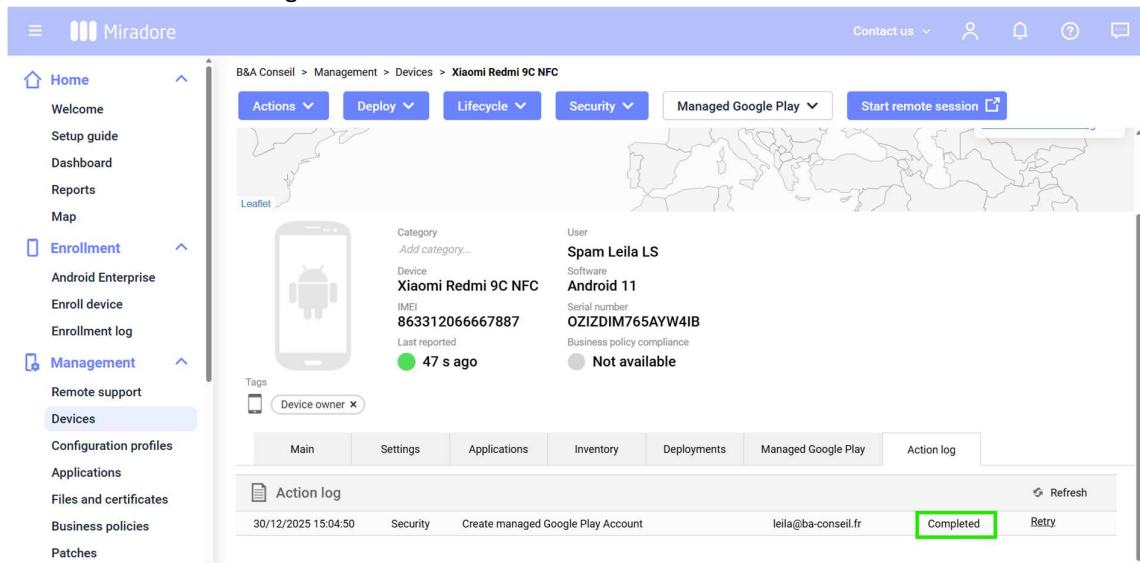

- b. Cela déclenche la création du **compte google managé**. L'utilisateur va recevoir une notification de l'application Miradore et doit cliquer sur la notification « **Managed account creation requested** »

The screenshot shows the Miradore web interface after the settings have been saved. The 'Action log' tab is selected, showing a list of actions. A green box highlights the 'Action log' tab and a specific log entry. The entry is dated '30/12/2025 15:04:50' and describes the action 'Create managed Google Play Account' for the user 'leila@ba-conseil.fr'. The status is 'In progress'.

(Coté utilisateur)

- c. Une fois que l'utilisateur aura cliqué sur la notification, il faut rafraîchir la page. Tant que l'action n'est pas **Completed**, il n'est pas possible d'effectuer la suite de la configuration.

- d. Dans la section **Tags**, sélectionner parmi les différents tags le **profil MDM** de l'utilisateur

Actions Deploy Lifecycle Security Managed Google Play Start remote session

Sync now

This action requests the selected device to connect to the MDM immediately. When you continue with sync now:

- The device will update the inventory information to the MDM.
- All created business policies relating to the device will be processed.
- This starts queued actions, such as configuration profile and application deployments, for the device.

- f. Demander à l'utilisateur de configurer un mot de passe sur le téléphone.
Paramètres > Ecran de verrouillage et AOD > Verrouillage de l'écran > **Numéro de série**.
- g. Une fois que l'appareil est **Compliant** et que dans la section **Deployments** tout est **Installed**, la configuration de l'appareil est terminée et il faut donc vous rendre dans le fichier XL en ligne et écrire « Configuré » dans la colonne **STATUT MIRADORE**.
